**Rebuild Project Management  
Information System (Unifier)**

## **Rebuild Project Management Information System (Unifier)**

Rebuild projects require that Project Users, Lead Designers, and General Contractors utilize Rebuild's Project Management Information System built on the Oracle Primavera Unifier. This system will facilitate review of design and construction documentation by Rebuild and City project partners, as well as provide a central location for project information to key partners. Implementation information can be found below, categorized by project phase.

Rebuild has procured and will issue licenses to one representative of each of the organizations listed below as "Users". Note that subcontractors to the General Contractor or subconsultants to the lead Designer will not be given licenses to the system. Subcontractor/subconsultant management systems and processes are left to the discretion of the General Contractor and Lead Designers.

### **DURING DESIGN**

#### Users:

- Rebuild Project Manager
- Project User (as applicable)
- PRA Manager (as applicable)
- Lead Designer

#### Core functions include but are not limited to:

- Storage of project contacts
