Ambric Technology Corporation Project No.: 13175-GE-23

Dear Mr. Raymond:

Ambric Technology Corporation (Ambric) is pleased to submit for your review the attached *Report of Geotechnical Investigation* for the above-referenced project. The attached report presents the results of Ambric's soils exploration efforts and presents recommendations for design of the proposed structural foundations, and related earthwork.

Ambric appreciates the opportunity to be of continued service to you. Please contact us with any questions or comments regarding the enclosed report.

Sincerely,

Ambric Technology Corporation

Joseph G. Mulvihill, P.E.
President

APPENDICES

APPENDIX A Geo-Probe Log
APPENDIX B Laboratory Test Results

SECTION 1.0

Introduction

1.1 AUTHORIZATION

Mr. Kurt Raymond of *CICADA Architecture/Planning, Inc.*, has issued authorization to Ambric Technology Corporation (Ambric) to perform the geotechnical investigation on this site relevant to the proposed demolition of the existing structure and the construction of a slab on grade multi-purpose recreational structure at the referenced project.

1.2 PURPOSE

The purpose of this subsurface exploration and analysis was to:

- ▶ Ascertain the various soil profile components at the geo-probe location;
- ▶ Estimate the engineering characteristics of the proposed foundation bearing and sub-grade materials;
- ▶ Provide geotechnical criteria for use by the design engineers in preparing the foundation;
- ▶ Provide recommendations for required earthwork and sub-grade preparation.
- ▶ Record groundwater conditions at the time of the investigation and discuss the potential impact on the proposed construction.

1.3 SCOPE

The scope of the exploration and analysis included the subsurface exploration, field testing and sampling, laboratory analysis, and a geotechnical engineering analysis and evaluation of the subsurface materials. This *Report of Geotechnical Investigation* is limited to addressing the site conditions as they relate to the physical support of the proposed construction. Any reference to suspicious odors is solely for clients informational purposes.

1.3.1 Field Exploration

Field exploration of the project site was conducted by means of soil geo-probes. Due to an existing structure at the referenced site, a soil boring could not be performed safely. As such, six manually operated geo-probes were performed within the proposed development area. The geo-probes extended to approximate depths ranging from 6'-00" to 12'-00" below existing sidewalk grade elevation. The location of the geo-probes are shown on the accompanying *Geo-Probe Location Plan* included as Figure 1.

The geo-probes were inspected by an Ambric representative who performed field tests, recorded visual classifications, and collected samples of the various strata encountered.

Geo-probes and penetrometer tests were conducted in an effort to determine the uniformity and density of the in-place soil samples recovered.

Groundwater level observations were recorded during and at the completion of field operations prior to backfilling the geo-probe. In relatively impervious soils, the accurate determination of the groundwater elevation may not be possible even after several days of observation. Seasonal variations, temperature effects, and recent rainfall conditions may influence the levels of the groundwater, and the observed levels will depend on the permeability of the soils. Groundwater elevations derived from sources other than seasonally observed groundwater monitoring wells may not be representative of true groundwater level.

1.3.2 Laboratory Testing Program

In addition to the field investigation, a supplemental laboratory testing program was conducted to determine additional, pertinent engineering characteristics of representative samples of site soils. The laboratory testing program was performed in accordance with applicable ASTM standard test methods and included physical/textural testing of representative samples of various strata.

The results of the laboratory testing program are presented in this section in a general manner and qualitatively interpreted. The results also are incorporated into the findings and recommendations discussed throughout this report. Detailed, quantitative results are provided in Appendix B.

Physical/Textural Analysis: Representative samples of various strata encountered were subjected to a visual inspection and a laboratory testing program which included analysis performed to support supplementary engineering soil classifications in accordance with ASTM D-2487. Laboratory results identified the following soil type as described using the Unified Soil Classification System:

- ***SW-SM*** - Silt with Sand (Weathered Decomposed Mica Schist)
- ***SM*** - Silty Sand (Weathered Decomposed Mica Schist)
- ***SW/SP*** - Sand (Weathered Decomposed Mica Schist)

SECTION 2.0 Site Description

2.1 SITE LOCATION AND DESCRIPTION

The subject property is located at the corner of N. 22nd Street and Lippencott Street (Panati Playground) in Philadelphia, Pennsylvania. The site is bound by N. 22nd Street to the west, Lippencott Street to the north, W. Clearfield Street to the south, and a commercial warehouse structure to the east.

2.2 EXISTING CONDITIONS

Surface Cover/Development: The referenced site is presently occupied by a slab on grade structure with an associated playground.

2.3 PROPOSED CONSTRUCTION

Ambric understands that the proposed site development will include the demolition of the existing structure and the construction of a multi-purpose recreational structure with a slab on grade. The proposed structure measures approximately 120 feet by 50 feet. The proposed development is located on the western side of the property at the intersection of N. 22nd Street and Lippencott Street.

SECTION 3.0

Site Geology

The geology presented herein is the natural geology for the geographical area of the site and does not account for fill materials or other which may have been placed on the site over time.

Underlying the area under consideration is part of the Wissahickon Formation and, in general, solid bedrock is 30 to 70 feet below the ground surface. This formation is the most prominent rock unit in the southeastern Pennsylvania area. It extends as a broad band from Trenton on the Delaware and eastern Maryland. The formation is a metamorphic rock which has been formed by the application of very intense pressure on sedimentary rocks (shales and sandstones). These were changed by metamorphism into schists, gneiss and quartzite. The major portion of the formation consists of the Wissahickon schist composed of several varieties of rock. Principally, these are Phyllite containing quartz, feldspar, muscovite, and chlorite, a coarsely crystalline feldspar-rich mica schist and grey-green-mica-chlorite-quartzite schist.

The Wissahickon schist is the formation most commonly encountered in the City of Philadelphia. It gives the broken surface on the schist a silvery or shiny appearance. The upper layers of those bedrock formations are characteristically weathered to various depths. This rock is generally believed to be originally sedimentary rock which has been metamorphosed (textural and mineralogically altered) by high levels of stress and temperature, although the original sedimentary stratification is often visible. The stratification is very irregular, and often steeply dipping.

The rock weathers to a soil, which is generally silty, contains mica flakes, small amounts of clay with some sand and rock fragments and is non-plastic to slightly plastic. As depth increases, plasticity decreases, clay content decreases, sand content increases, size and number of rock fragments increase, and density increases. The soil usually grades imperceptibly into decomposed rock and eventually into sound rock, generally without a well-defined boundary.

GENERALIZED ENGINEERING CHARACTERISTICS OF THE WISSAHICKON FORMATION ROCK DISCONTINUITIES

Irregular joints, steeply dipping and open are observed on the Wissahickon Formation which tend to be widely spaced at 3.0 to 10.0 feet. Joints and foliation constitute a natural plane of weakness in the rock which greatly reduces allowable rock bearing capacity.

POROSITY AND PERMEABILITY

Joints and foliation in the Wissahickon Formation provide a low secondary porosity which in turn partially accounts for a permeability of 0.2 to 3.0 feet per day and may allow for a maximum groundwater yield of approximately 75 gallons per minute in deep (150 to 300 feet) bores.

FORMATION STABILITY

The Wissahickon Formation is considered to have good foundation stability for heavy structures if the rock is excavated to *sound material*. *Sound rock* being defined as rock exhibiting greater than 80 percent recovery in cores.

SECTION 4.0 Subsurface Conditions

4.1 GEO-PROBE SUBSURFACE SOIL PROFILE

The subsoil conditions as disclosed by the geo-probes drilled as part of this exploration and interpolation reflect the following:

Surface Materials: Approximately six to eight inches of concrete was encountered at the geo-probe locations.

Stratum I, Miscellaneous Fill: Underlying the surface materials within the geo-probes performed as part of this exploration, a miscellaneous fill material consisting of mica schist, brick, concrete, asphalt, rock fragments, silt, sand, and gravel was encountered. This stratum extended to approximate depths ranging from 2'-00" to 6'-00" below existing sidewalk elevation. Geo-probe GP-2 was terminated within this stratum at an approximate depth of 6'-00" below grade. Such uncontrolled fill materials generally varies in both composition and density with location and elevation below grade.

Stratum II, Silty Sand: Beneath stratum I within geo-probes GP-3, GP-5, and GP-6 performed as part of this exploration, a natural material consisting of brown/red silty sand with some organic's was encountered. This stratum extended to approximate depths ranging from 5'-00" to 6'-00" below existing sidewalk elevation.

Stratum III, Sand and Gravel: Underlying stratum I within geo probe GP-4 performed as part of this exploration, a natural material consisting of brown/gray fine to coarse sand and gravel was encountered. This stratum extended to the end of the geo-probe at an approximate depth of 6'-00" below existing sidewalk elevation.

Stratum IV, Weathered Decomposed Mica Schist: Beneath stratum I within geo-probe GP-1 and underlying stratum II within geo-probes GP-3, GP-5, and GP-6 performed as part of this exploration, a natural material consisting of brown/orange/silver/red weathered decomposed mica schist was encountered. This stratum extended to the end of the geo probes at approximate depths ranging from 8'-00" to 12'-00" below existing sidewalk elevation.

4.2 GROUNDWATER

Groundwater was not encountered within the geo-probes performed as part of this investigation. Additionally, it must be noted that groundwater levels are subjected to seasonal fluctuations or following periods of precipitation.

SECTION 5.0

Conclusions and Recommendations

5.1 GENERAL

The results of the subsurface investigation indicate that the proposed structure may be supported by a spread footing foundation system bearing on/within the natural subsoils of stratum II/III/IV at an approximate depth outlined in Table No. 1 or a prepared compacted fill sub-base.

5.2 FOUNDATION RECOMMENDATIONS

5.2.1 Spread Footings:

Based on geotechnical engineering analysis using the results of our field investigation and a review of the proposed finished floor elevation (outlined in Table No. 1), it is concluded that a spread footing foundation system bearing on/within the natural subsoils of stratum II/III/IV at approximate depths outlined in Table No. 1, or a prepared compacted fill, is the most suitable foundation for this proposed development.

Spread Footings utilizing presumptive bearing values outlined in Table No. 1 would be expected to sustain negligible settlement with an adequate safety factor against shearing displacement.

We recommend that the footings for the proposed structure be designed and constructed in accordance with the following criteria:

- Surface materials, underlying fill materials and natural subsoil's must be removed from the proposed foundation down into stratum II/III/IV, at approximate depths outlined in Table No. 1. The exposed sub-grade should be compacted in place. Any unstable/deleterious materials encountered should be further undercut as directed by the site engineering inspector.
- Where fill material is required in order to achieve finished subgrade elevation, Ambric recommends that a select structural fill (2A modified, recycled concrete or equivalent) as approved by the engineers be utilized as backfill up to finished sub-grade elevation. The fill material should be placed in eight-inch to ten-inch loose lifts and compact to in excess of 95 percent of its maximum modified density, in accordance with the *Recommended Earth Fill Procedures* presented herein.
- All compacted fill materials should extend a minimum of one foot horizontal for each foot of vertical fill below the foundation.
- All foundations based on the natural soils or prepared fill sub base should be proportioned for combined dead and live load with a maximum allowable bearing value outlined in Table No. 1.
- The exposed natural subsoil or fill materials at the bottom of foundation elevation should be compact in-place prior to placement of concrete.
- Construction and inspection of footings should be scheduled so as to minimize exposure of the bearing soil to the atmosphere.

- All excavation work must be performed in accordance with OSHA guidelines. Adequate sheeting/shoring/bracing must be provided as necessary, per OSHA guideline. All excavation and protection of adjacent properties must be performed in accordance with City of Philadelphia Code Bulletin of Information B-0503-R3 (dated November 8, 2022). At no time should excavation extend below foundations of adjacent structures without assessment and design by the Structural Engineer of Record. Additionally, the Structural Engineer of Record should assess the stability of the in-place adjacent foundations and foundation walls and determine the need for underpinning/sheeting/shoring/bracing in order to safely secure the existing structures during the proposed development. The Structural Engineer of Record should make provisions for lateral loading which may be induced on existing structures from the proposed development and/or visa-versa.
- **Demolition:** All demolition work must be performed in strict accordance with Local Code and Safety Practices. All work must be performed by a licensed contractor who has demonstrated successful history on similar projects of this size and scope. Such work/design or other is not within our scope of services.
- **Health/Safety/Licenses:** All work recommended herein must be performed in accordance with the requirements and guidelines set forth by the City of Philadelphia and OSHA Guidelines, and recommended good practice. All contractors must be licensed contractors, who have a successful track record on projects of similar size, scope and characteristics.

The recommendation's presented herein are based on the premise that all work performed be inspected by a geotechnical engineer.

<i>Test Boring No.</i>	<i>Existing Grade Elevation (ft)</i>	<i>Proposed Finished Floor Elevation (ft)</i>	<i>Proposed Foundation Elevation (ft)</i>	<i>Approximate Depth of Bearing Stratum (ft)</i>	<i>Recommended Depth of fill Material Beneath Foundation (ft)</i>	<i>Allowable Soil Bearing Capacity (psf)</i>
GP-1	0'-00"	0'-00"	-3'-00"	5'-06"	2'-06"	2,000
GP-2	0'-00"	0'-00"	-3'-00"	* 7'-00"	4'-00"	2,000
GP-3	0'-00"	0'-00"	-3'-00"	3'-00"	0'-00"	2,000
GP-4	0'-00"	0'-00"	-3'-00"	4'-00"	1'-00"	2,000
GP-5	0'-00"	0'-00"	-3'-00"	3'-00"	0'-00"	2,000
GP-6	0'-00"	0'-00"	-3'-00"	3'-00"	0'-00"	2,000

NOTES:

* Anticipated Depth

Assumed Existing Grade to be 0'-00".

Proposed Foundation Elevation: Approximately 3'-00" below grade (frost elevation)

5.2.2 Adjacent Foundation: (Code Bulletin B-9906)

Currently there are no structures within 10 feet of the proposed development. As such, no special provisions/precautions are anticipated.

5.2.3 SHEETING & SHORING

Based on a review of the project drawings and our understanding of the proposed development, if the unbraced excavation angle of 1.5:1 (horizontal: vertical) can not be achieved during construction, sheeting/shoring should be provided along the front, west side abutting the sidewalk at N. 22nd Street and abutting the sidewalk at Lippencott Street. Please be advised that all work must be performed per OSHA guideline and local code.

5.3 FLOOR SLAB RECOMMENDATIONS: SLAB-ON-GRADE

It is recommended that floor slabs for the proposed building be supported on grade in accordance with the following criteria.

SUB-GRADE PREPARATION

All in-place fill soils and natural subsoils where encountered should be removed down to designated floor slab, sub-grade or stratum II/III/IV, whichever is greater. The exposed sub-grade should be compacted in place under the supervision of an engineer. Any unstable/deleterious materials encountered should be further undercut as directed by the site engineering inspector. If fill material is required in order to achieve finished sub-grade, a select fill material should be placed and compacted in accordance with the *Recommended Earth Fill Procedures* presented herein, per ASTM D-1557. All fill material should be placed and compacted so as to achieve density of at least (95%) of the maximum modified density (ASTM D-1557).

SUB-FLOOR FILL

Sub-floor fill materials should be approved, readily compatible granular material. All sub-floor fills should be placed in approximate horizontal lifts having a loose thickness of not more than eight (8") inches. Each lift should be compacted to at least ninety-five (95%) percent of the maximum modified density. All fill material should be placed and compacted in accordance with the Recommended Earth Fill Procedures attached herein. A vapor barrier should be incorporated into the sub-grade preparation as specified by the Architect/Engineer of Record.

SLAB DETAILS AND CONSTRUCTION

Reinforced concrete floor slabs should be simply supported so as to permit unrestricted rotation of the edge of floor slabs at floor-wall junctures. To preclude slab cracking due to shrinkage and slight grade movements, dummy groove joints should be cut or preformed at intervals not exceeding maximum spacings per Code. These joints should also extend through the floor covering if sensitive to reflection cracking. A vapor barrier should be installed beneath the slab in accordance with design recommendations.

5.4 EXCAVATIONS

The site soils encountered during the investigation are consistent with Type C Soil Conditions as defined by 29 CFR Part 1926 (OSHA) which require a maximum unbraced excavation angle of 1.5:1 (horizontal: vertical). Actual conditions encountered during construction should be evaluated by a competent person (as defined by OSHA) to ensure that safe excavation methods and/or shoring and bracing requirements are implemented.

6.7 MOISTURE CONTROL

The moisture density curve for the fill used shall be supplied to the contractor as a guide in controlling moisture to achieve the required degree of compaction. If, in the opinion of the soils engineer, fill material becomes too wet for the required compaction, the fill shall be dried by a method approved by the soils engineer prior to commencing or continuing compaction operation. Likewise, if in the opinion of the soils engineer, the fill material becomes too dry for the required compaction, the fill shall be moistened by a method approved by the soils engineer prior to commencing or continuing compaction operations.

6.8 DRAINAGE OF SOIL

At all times, maintain and operate proper and adequate surface and subsurface drainage to the satisfaction of the soils engineer in order to keep the construction site dry and in such condition that placement and compaction of fill may proceed unhindered by saturation of the area.

6.9 ELEVATION

The contractor shall furnish to the soils engineer the final elevation of each accepted, compacted lift before placing or compacting the next succeeding lift. The number of such elevations on each lift shall be determined by the soils engineer.

6.10 FROST

No fill materials shall be placed when either the fill material or the previous lift (or sub-grade) on which it is placed, is frozen. In the event that any fill which has already been placed or the sub-grade shall become frozen, it shall be scarified and re-compacted, or removed, to the approval of the soils engineer before the next lift is placed. Any soft areas resulting from frost shall be removed or re-compacted to the satisfaction of the soils engineer before new fill is replaced.

SECTION 7.0 General Comments

Supplemental recommendations may be required upon finalization of construction plans or if significant changes are made in the characteristics or location of the proposed structure. Soil bearing conditions should be checked at the appropriate time for consistency with those conditions encountered during Ambric's geotechnical investigation.

The conclusions and recommendations presented in this report are based on information revealed by the subsurface exploration and upon the assumption that the soil conditions do not deviate from those disclosed by the geo-probes. An attempt has been made to provide for normal contingencies, but the possibility remains that unexpected conditions may be encountered during construction. Should such events occur, we should be notified so that modifications to our recommendations can be made, if necessary. An allowance should be to account for additional costs that may be incurred to construct the foundation as recommended herein. Extra costs may result for various reasons, including additional excavation and/or backfill.

The recommendations presented herein should be utilized by a qualified engineer in preparing the project plans and specifications. The engineer should consider these recommendations as minimum physical standards which may be superseded by local and regional building codes and structural considerations. These recommendations are prepared for the use of *CICADA Architecture/Planning, Inc.*, for the specific project detailed and should not be used by any third party. These recommendations are relevant to the design phase and should not be substituted for construction specifications.

Ambric assumes that a qualified contractor will be employed to perform the construction work, and that the contractor will be required to exercise care to ensure all excavations are performed in accordance with applicable regulations and good practice. Particular attention should be paid to avoiding damaging or undermining adjacent properties and maintaining slope stability.

Ambric recommends that the services of the geotechnical engineer be engaged to test and evaluate the soils in the footing excavations prior to concreting in order to determine that the soils will support the bearing capacities. Monitoring and testing should also be performed to verify that suitable materials are used for controlled fills and that they are properly placed and compacted over suitable sub-grade soils.

The exploration and analysis of the foundation conditions reported herein are considered sufficient in detail and scope to form a reasonable basis for the foundation design. If deviations from the noted subsurface conditions are encountered during construction, they should be brought to the attention of the geotechnical engineer. Additionally, an allowance should be made for increase cost or schedule delay as a result of unanticipated conditions.

APPENDIX B
Laboratory Test Results

LABORATORY ANALYSIS

PANATI PLAYGROUND N. 22ND STREET & LIPPENCOTT STREET, PHILADELPHIA, PENNSYLVANIA

Soils samples obtained at the time of the Subsurface Exploration were submitted to our laboratory for testing and analysis. The purpose of our testing program was to identify the soils forming the strata and to determine the physical properties of these soils. Composite disturbed samples were subjected to the following laboratory tests:

Particle Size Analysis {ASTM D-422}

The particle size test for gradation indicated the amount of material of each grain size in a given soil.

Moisture Content {ASTM D-2216}

The moisture content is the ratio (expressed as a percentage) of the weight of water in soil to the weight of solid particles forming the soil.

Atterberg Properties Determination:

Liquid Limit -- The liquid limit is the moisture content at which the soil will close when subjected to sharp blows.

Plastic Limit -- The plastic limit is the moisture content at which the soil begins to crumble when rolled into thin threads.

**Re: Preliminary Clean Fill Sampling
Vincent G. Panati Playground
3101 N. 22nd Street, Philadelphia, PA 19132**

Dear Mr. Stromberg,

EEI is pleased to present this letter summarizing the findings of the preliminary clean fill sampling investigation performed at the above referenced property. This assessment was intended to characterize the subsurface materials on the site and identify if the materials would be suitable for export as clean fill. The overlying concrete slab and subgrade stone are defined as clean fill material unless there is evidence of a spill or release impacting these materials.

Field Investigation

On January 2, 2024, EEI arrived on site to advance a series of six (6) borings at proposed locations around the existing structure and basketball court. EEI utilized a portable Geoprobe LP sampler to depths ranging from 0.5 to 6.0 feet below existing grade. Due to the thickness of concrete slabs throughout the proposed sample area only four (4) of the six (6) borings were advanced into the underlying soils. The borings were designated B-1 through B-4. Recovered soils consisted primarily of brown, micaceous silty sand to orange sandy silt at depths ranging from 3.5 to 6.0 feet below existing grade. The residual soils on the site were overlain by a layer of fill material comprised of abundant brick fragments in brown silty sand with concrete fragments at depths ranging from 0.5 to 3.5 feet below existing grade. Refusal was encountered in B-1, B-3, and B-4 on concrete or debris at 0.5 feet, 2.0 feet, and 1.5 feet respectively. EEI utilized a photo-ionization detector (PID) to measure levels of Volatile Organic Compounds (VOCs) in the recovered soils. No detections were found in the recovered soils.

Eight (8) discrete soil samples were collected to create two (2) composite soil samples submitted for the analysis of Semi-Volatile Organic Compounds (SVOCs), Pesticides, Polychlorinated Biphenyls (PCBs), and Priority Pollutant Metals. One discrete from each composite sample set was submitted for the analysis of VOCs. The approximate locations of each sample can be found in the figure below.

Laboratory Analysis

The results of the laboratory analysis were tabulated by EEI with the applicable comparison limits for Clean Fill (CFCL). The detected results of the analysis are presented in the following table. A complete copy of the Mid-Atlantic Environmental Laboratories Analytical Report can be found attached to this letter.

			Clean Fill Limits
	0102-1	0102-2	
Metals			
Chromium (Total)	27.1	24.8	190000
Chromium (Trivalent)	27.1	24.8	190000
Chromium (Hexavalent)	ND	ND	37
Copper	22	41	7200
Lead	31.8	25.4	450
Nickel	14.1	12.2	650
Zinc	82.6	75.4	12000
Semi-Volatiles			
Benzo[a]anthracene	0.323	ND	6.1
Benzo[a]pyrene	0.389	0.171	4.2
Benzo[b]fluoranthene	0.423	ND	3.5
Benzo[g,h,i]perylene	0.3	ND	180
Benzo[k]fluoranthene	0.145	ND	3.5
Chrysene	0.267	ND	35
Di-n-butylphthalate	0.145	0.126	1400
Fluoranthene	0.623	ND	3200
Indeno[1,2,3-cd]pyrene	0.278	ND	3.5
Phenanthrene	0.412	ND	10000
Pyrene	0.523	ND	2200

Table 1: Summary of Detected Concentrations

Conclusions

After a review of the laboratory data, the soils sampled as part of this assessment meet the requirements to be exported as clean fill. Concrete is classified as clean fill by definition if it is not painted or impacted by a spill or release. The concrete slabs encountered are expected to meet this definition based on the field investigation's findings, though the volume these slabs represent is unknown.

Earth Engineering Incorporated appreciates the opportunity to assist you with this project. If you have any questions regarding this project, please call our office.

Sincerely,

EARTH ENGINEERING INCORPORATED

ANALYTICAL REPORT

Project Name: Panati Playground CF 20240102

Date Sampled: 1/2/2024 11:10 AM

Sampled By: MWP

Sample Matrix: Soil

Sample Type:

Lab Project #: 60009

Lab Sample #: 60009-2

Client Sample ID: 0102-2

Akhter mehmood

Akhter Mehmood
Lab Director

ANALYTICAL REPORT

Methodology

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the MAEL website at <http://maelinc.com/MAELcertification.pdf>

Qualifiers

B	Detected in method blank	E	Detected above calibration limits, result estimated
H	Parameter run out of hold time	J	Detected below PQL, result estimated
P	Incorrect Preservative	R	See report notes
SUB	Sub-Contracted to ALS Middletown PA	N	Not NELAP/TNI certified for parameter
Q	Insufficient sample provided for MS/MSD, in analytical batch, LCS/LCS duplicate substituted	C	NELAP/TNI certification not available for this parameter

Abbreviations

ppm	Parts Per Million (mg/kg or mg/L)	PQL	Practical Quantitation Level
ppb	Parts Per Billion (ug/kg or ug/L)	attached	Subcontract Lab Report Attached
g	gram (1000 g = 1Kg)	ND	Not Detected
kg	kilogram (1 kg = 1000 g)	NA	Not Applicable
mg	milligram (1000 mg = 1 g)	NS	Not Spiked
mg/kg	milligram per kilogram (ppm)	NP	No PCB pattern detected
ug/kg	microgram per kilogram (ppb)	NR	Not Requested
ug	microgram (1000 ug = 1 mg)	NI	Not Ignitable
L	liter (1 L = 1000 mL)	NFL	No Free Liquid
ml	milliliter (1000 ml = 1 L)	NTU	Nephelometric Turbidity Units
ul	microliter (1000 ul = 1 ml)	S.U.	Standard Unit
mg/L	milligram per liter (ppm)	RPD	Relative Percent Difference
ug/L	microgram per liter (ppb)	RSD	Relative Standard Deviation
ng/kg	nanogram per kilogram	MS/MSD	Matrix Spike/Matrix Spike Duplicate
BTU/lb	British Thermal Units per pound	LCS	Laboratory Control Sample
CFU/mL	Colony Forming Units per milliliter	BS	Blank Spike (Method Spike)
MPN/100 ml	Most Probable Number per 100 mL	o F	degrees Fahrenheit
mS/cm	milli Siemens per centimeter	o C	degrees Celsius
uS/cm	micro Siemens per centimeter	umhos	Conductivity Units
ug/sq cm	microgram per square centimeter	ohms	Resistivity Units
ug/sq ft	microgram per square feet	RL	Reporting Limit
ug/wipe	microgram per wipe		

Note: All non-aqueous samples, with the exception of oils, wipes, and paint chips are dry weight corrected
 PQL-The Practical Quantitation Limit (PQL) is the lowest level that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operating conditions.

RL-Reporting Limit is greater than or equal to PQL.

Asbestos Inspection Report

1. Name of Building / Property: _____ Address _____

2. Name of Building / Property Owner: _____ Address _____ Phone No. _____

3. Name of Philadelphia Certified Investigator: _____ Certification No. _____ Contact Information / Email / Phone No. _____
L&I Commercial Activity No. (Former Business Privilege License No.) _____ Business Tax ID No. _____

4. Name of Philadelphia Licensed Laboratory: _____ License No. _____ Phone No. _____

5. Scope of Work: (Insert or attach a complete description of the portion of the subject property inspected and the anticipated work that will result in the disturbance of the identified Asbestos Containing Materials (ACMs) (e.g. demolition, asbestos abatement, and / or renovation activities.)

6. Property has been declared to be in imminent danger (ID) of failure or collapse by the City of Philadelphia Department of Licenses & Inspections. Attached is a copy of the L&I Notice of Violation declaring the property I.D. ****Note: INVESTIGATOR MUST BE ON SITE DURING DEMOLITION!**

7. (ACMs) identified? Yes (List Below) No (explain)

8. Suspected ACM's sampled? Yes (attached are copies of the laboratory chain of custody and bulk sample results.) No (Why?)

9. List all identified ACM's located in the planned renovation/demolition areas. Damaged ACM must be listed and then repaired or removed prior to renovation. You (Investigator) must label all ACM that may be left in the work area. (Attached are add'tl sheets)

Location	Description	Type (Code 1)	Amount		Condition (Code 2)	Action (Code 3)
			Square	Linear		

Code 1

FRI - Friable
NF1 - Non-Friable, Cat. 1
NF2 - Non-Friable, Cat. 2

Code 2

DD - Deteriorated or Delaminated
ND - Non-Damaged

Code 3

REM - Removal necessary prior to Demo/Reno
NRN - No removal necessary, label ACM
REP - Repair & Label ACM, removal not necessary

10. I hereby certify that the foregoing statements are true and the information contained in this report is true. This certification is made subject to the penalties set forth in 18 PA. C.S. S4904 relating to unsworn falsification to authorities. Furthermore I certify that the inspection, sampling, and labeling requirements of section X of the Asbestos Control Regulation (ACR) have been met. The building owner has been notified of the ACR requirements and given a copy of this report. If the inspection has revealed ACM which will be disturbed by the proposed work or if it has revealed ACM in bad condition, the building owner has been notified to remove or repair the ACM in accordance with the ACR prior to renovation or demolition activity.

11. Signature of Certified Asbestos Investigator:  Date: _____ Signature of Building Owner: _____ Date: _____

SUMMARY

This report summarizes Duffield Associates, LLC's (Duffield's) Phase I Environmental Site Assessment (ESA) completed for the Panati Playground (Panati Playground or "Property") located at 3101 North 22nd Street Philadelphia, Pennsylvania. This work was performed to support redevelopment planning and activities at the Property.

In addition to completion of a Phase I ESA and to provide redevelopment support, a hazardous materials survey was performed that included inventory of universal hazardous wastes and sampling and analysis of soils for the presence of lead. Asbestos and lead-based paint surveys were also conducted and are summarized in this report.

This Phase I ESA was performed in conformance with the scope and limitations of ASTM Practice E1527-13 and was completed to satisfy the federal All Appropriate Inquiry practice (40 CFR 312). The purpose of All Appropriate Inquiry is to identify recognized environmental conditions (RECs) at the Property. According to information provided by the City of Philadelphia, Panati Playground, located in the Allegheny West Neighborhood in North Philadelphia, first opened as a playground in 1967. Review of historical aerial photographs, Sanborn maps and topographic maps indicate that the Property was a brewery and an automotive repair shop until construction of the Panati Playground.

This assessment revealed the following RECs for the Property:

in connection with the Property except for the following:

- Three gasoline USTs were depicted in the Sanborn maps located in the Automotive repair shop portion of the site along Clearfield Street. No documentation of the removal or closure of the three gasoline tanks was discovered in the records search. These tanks, if present, are of unknown condition and have the potential to have impacted soil and groundwater.
- A permit for a 6,000 gallon heating oil tank was granted in 1934. No documentation of the removal or closure of the 6,000 heating oil tank was discovered in the records search. This tank, if present, is of unknown condition and has the potential to have impacted soil and groundwater.
- The adjoining site at 2200 W. Allegheny Ave has a history of petroleum impact to soils. There is the potential that this site has impacted subsurface conditions at the Property.
- The adjoining site at 2044 W. Allegheny Ave, Philly Gas has a history of petroleum impacts to soils. There is the potential that the Philly Gas site has impacted groundwater conditions at the Property and is considered a REC.

In addition to completion of a standard Phase I ESA, additional services were requested. Our findings are as follows:

- A summary of identified UHW is provided on Table 1.
- Lead was detected in shallow soils. The reported range of concentrations was between 44 milligrams per kilogram (mg/kg) and 180 mg/kg, well below the U.S. Environmental Protection Agency (EPA) standard of 400 mg/kg for bare soil in residential play areas. No further assessment of lead in soils is recommended.
- Asbestos-containing materials were identified in the building which included pipe insulation, transite boiler flue, and caulk. Asbestos-containing building materials were assumed to be present in certain inaccessible areas of the building above the ceiling, behind walls, inside the boiler internal, fire doors, and roofing materials. These are summarized on Table 3.
- Lead-based paint was identified on mosaic tile, wood frames and door supports outside of the building as well as wood frames, window sills, and window sashes inside the building. A wall below the windows and a shelf in the equipment and storage rooms also were reported to contain lead-based paint. Table 4 summarizes the locations of lead-based paint coated building materials at the Property.

Recommendations are provided in Section 7.E of this report.

1. INTRODUCTION

This report summarizes Duffield Associates, LLC's (Duffield) Phase I Environmental Site Assessment (ESA) of the Panati Playground (Panati Playground or the Property) in Philadelphia, Pennsylvania. The Property is located in the Allegheny West Neighborhood of North Philadelphia and is currently open to the public. The Property is depicted on Figure 1.

The assessment was performed in general accordance with the practice outlined in ASTM International's "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessments Process" (ASTM E1527-13). The ASTM E1527-13 practice is recognized under the United States, Environmental Protection Agency's (EPA) "Standards and Practices for All Appropriate Inquiries" (Code of Federal Regulations, Title 40, Part 312).

A. LOCATION AND LEGAL DESCRIPTION

The Property is identified as the Panati Playground, which is located within The Allegheny West Neighborhood. The limits of the Property, as defined herein, are shown on Figure 2.

- The Owner of the Property is the City of Philadelphia.
- The land area of the Property is approximately 0.56 acres.
- The Panati Playground is zoned as SP-PO-A: Recreation.
- The Property is comprised of three tax parcels 039N10270, 039N10272, and 039N10277.
- The Property is identified by Office of Property Assessment (OPA) with Account#885927460.

B. PURPOSE

The purpose of this Phase I ESA was to identify recognized environmental conditions (RECs) at the Property. Within limitations, the term RECs mean the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

C. DETAILED SCOPE OF SERVICES

Duffield reviewed selected historical and regulatory information pertaining to the Property and nearby lands, and performed a walking visual reconnaissance that included a UHW survey, Lead in Soil Testing and an asbestos and lead based paint survey in accordance with the scope of services described in Appendix B.

D. SIGNIFICANT ASSUMPTIONS

This report is based on Duffield's professional judgment of environmental conditions observed during our visual reconnaissance of the Property, our interpretation of the reviewed aerial photographs, historical documents, regulatory information, and information conveyed to us through interviews. Our ability to effectively identify and assess environmental conditions is based on assumptions that: the conditions of concern were visible; the documents reviewed provide a reasonable and accurate record of historic land use and practices; and the interviewees provided thoughtful and truthful responses to the questions posed and are familiar with past practices and occurrences at the Property.

E. LIMITATIONS AND EXPECTATIONS

While this evaluation was performed in an effort to generally characterize the environmental conditions of the Property, the observations, conclusions, and recommendations are based solely on conditions encountered at the time of the reconnaissance effort. Latent conditions and other contingencies bearing upon the environmental condition of the site may be evident in the future.

F. USER RELIANCE

This report has been prepared for The City of Philadelphia the "Users" of this document. No other parties may rely upon the information contained in this report without the prior written consent of Duffield.

2. USER-PROVIDED INFORMATION

Mr. Daniel Harkins, Project Coordinator, City of Philadelphia, Department of Public Property, representing the Users and supporting preparation of this Phase I ESA completed the User Questionnaire provided in Appendix C of this report. Mr. Harkins' responses to the questionnaire are summarized below.

A. SPECIALIZED KNOWLEDGE

The User has no specialized knowledge of the Property or the surrounding properties.

B. COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Mr. Harkins was unaware of did not know of any chemicals present at the Property or spills or releases of chemicals on or at the Property.

C. VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Mr. Harkins indicated that the Property is not being sold and that a value reduction due to environmental concerns is not applicable.

D. OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

- Owner: The City of Philadelphia, Department of Public Property
- Property Manager: Ron Hinton, President of the Allegheny West Foundation
- Occupant: The Property is occupied by the Panati playground and recreation center. Additionally, the Property is used as a food distribution center and polling center.

E. REASON FOR PERFORMING PHASE I

The User of this report is performing due diligence in advance of demolition and redevelopment of the Property.

3. RECORDS REVIEW

A. PHYSICAL SETTING SOURCE

Based on Duffield's review of a United States Geological Survey (USGS) topographic map (see Figure 1 – Site Location Map), the Property appears to be located on a relatively flat area. The topographic map indicates that the ground surface elevation of the Property approximately 120 feet above mean sea level (MSL). Based on topographic mapping, the area of the Property slopes downward to the south-southeast.

B. STANDARD ENVIRONMENTAL RECORD SOURCES

Our subcontractor (EDR, Inc.) obtained information from standard environmental records sources for sites identified within the ASTM E1527-13 search radii. EDR's Radius Map Report presents a summary of environmental database search results. The Radius Map Report, dated July 5, 2022, is included in Appendix D.

The Radius Map Report's search results were refined to listings of the Property, adjoining sites, and potentially "upgradient" sites within the search radii only. Table A (below) refines the Radius Map Report's search results listings of the Property, adjoining sites and "upgradient" sites. Potentially "upgradient" sites are estimated based on the anticipated groundwater flow direction as described in Section 3.A (Physical Setting Source). Sites listed in this table are potential RECs in connection with the Property. The Property is not listed in any of the reviewed regulatory databases.

Discussions of the sites, listed below in Table A, are provided in Section 6.A (Findings and Opinions).

**Table A: Refined Environmental Database Listings
(The Property, Potentially Upgradient Sites, and Adjoining Sites)**

Standard Regulatory Databases	Upgradient Minimum Search Distance (miles)	Site Name	Site Address
Federal NPL site list	1	None	-
Federal Delisted NPL site list	0.5	None	-
Federal CERCLIS list	0.5	None	-

CERCLIS = Comprehensive Environmental Response, Compensation, and Liability Information System
RCRA = Resource Conservation Recovery Act SHWS = State Hazardous Waste Sites
TSD = Treatment, Storage, and Disposal NPL = National Priority List

C. ADDITIONAL ENVIRONMENTAL RECORD SOURCES

Duffield searched additional environmental record sources including the Pennsylvania Activity and Use Limitation (PA AUL) Registry, the Pennsylvania Department of Environmental Protection (PADEP) eFACTS online database, and the United States Environmental Protection (USEPA) online database for additional information pertaining to the Property and sites listed in Table A above, if any.

1. PA AUL REGISTRY AND ENVIRONMENTAL LIEN SEARCH

Duffield searched the PA AUL Registry for additional information pertaining to the Property and sites listed in Table A above, no documents were obtained within the required search radius of the site. The PA AUL map is provided in Appendix H.

2. PADEP eFACTS WEBSITES

Duffield searched the PADEP eFACTS online databases. The following documents regarding the Property and sites listed above in Table A were obtained:

- Global Montello Group – 2200 West Allegheny Ave, State and tribal leaking storage tank lists (LUST/LAST): Site is listed as an Environmental Cleanup and Brownfields site. The facility was issued three UST permits in 1999, 2003 and 2020. The Facility Search Tank Remediation section identifies three UST releases in 1989, 1997 and 2021. The 1994 and 1998 cleanup status is noted as completed. For the 2021 release, cleanup status is listed as Interim Remedial Actions Initiated or Completed.
- Passyunk Homes – 3111 S 23rd Street, State and tribal leaking storage tank lists (LUST/LAST): The address is not consistent with the placement of the EDR Report. This listing appears to be in South Philadelphia.
- Allegheny Citgo - 2401 W. Allegheny Ave, State and tribal leaking storage tank lists (LUST/LAST): – listed in eFACTS as Global Montello Group 3435. This is listed as an active Environmental Cleanup and Brownfields site. Three confirmed releases in 1994, 1998 and 2021. The status of the 1994 and 1998 releases is Cleanup Completed. The 2021 release status is Interim Remedial Action or Complete.
- Philly Gas - 2044 W Allegheny Ave State and tribal leaking storage tank lists (LUST/LAST): This is listed as an active Environmental Cleanup and Brownfields site. Three permits for USTs were issued one in 1989, one in 2007 and one in 2018. A release was confirmed in 1996 and reported cleaned up in 2005. Another release was confirmed in 2007 and

cleaned up in 2008. The site has multiple violations from 2001 to 2022, during facility operations and inspections and administrative file reviews.

- Thyssenkrupp Budd Co Hunting Park FAC- 2450 W Hunting Park Ave, State and tribal leaking storage tank lists (LUST/LAST) and State and tribal voluntary cleanup (VCP) sites: The site is listed as an Environmental Cleanup and Brownfields site. The record indicates impact to soil. An NIR was received in 2003. The NIR indicates cleanup is not required.
- Keystone Place at East Falls LLC - 3310 Fox Street, State and tribal voluntary cleanup (VCP) sites: The site is listed as an active Environmental Cleanup and Brownfields site. Two (2) NIRs were submitted, one in 2020 and one in 2021. The release is listed as fuel oil # 2. A remedial investigation demonstrating attainment of the statewide health standard was complete in April 2022.

The above documents are provided in Appendix H.

3. USEPA ENVIROFACTS WEBSITE

Duffield searched the USEPA Envirofacts online database. The following documents regarding the Property and sites listed above in Table A were obtained:

- 2100 W. Allegheny Ave, 2100 W. Allegheny Ave: USEPA Envirofacts documentation of cleanup, Cleanups In My Community (CIMC) ACRES Summary, Phase I complete.
- 2134 W. Allegheny Ave, 2134 W. Allegheny Ave: USEPA Envirofacts – an assessment grant was issued in 1995 and a Phase I Environmental Assessment was completed in 2001. The status is listed as closed.
- 3300 Stokey, 3300 Stokey: USEPA Envirofacts documentation of cleanup, Cleanups In My Community (CIMC) ACRES Summary. No activity reported in ACRES.
- Global Montello Group, 2200 W. Allegheny Ave: USEPA Envirofacts listed as a RCRA small quantity generator of hazardous waste, including benzene and ignitable waste.
- City of Philadelphia Garage 4233, 3201 Fox Street: USEPA Envirofacts listed as a RCRA small quantity generator of hazardous waste including benzene and ignitable waste, tetrachloroethylene and trichloroethylene.

The above documents are provided in Appendix H.

4. ORPHAN SITES

Seven orphan sites are listed in the EDR Radius Map Report (Appendix D). Orphan sites are those that could not be located on a map by EDR. All seven of the orphan sites were located and determined to be downgradient or beyond the

search radius for the Standard Environmental Records Source Database and are no longer discussed herein.

5. CITY OF PHILADELPHIA RECORDS

Duffield reviewed the City of Philadelphia online zoning archive database and Licenses and Inspections online permit database for the Property address 3101 N 22nd Street. In 1958 an existing factory “Royal Factories, Inc” occupied the north side of the property. Along 22nd and Clearfield was a tavern and restaurant. Along 22nd street between Clearfield Street and Lippincott Street was vacant land, a garage and 1-2 story residential and commercial buildings. A permit request was denied to expand the garage and auto repair shop on the existing garage and repair shop onto vacant land at the Property. A permit request was submitted to expand on the Royal Factories site, used for aluminum and metal manufacturing and office space was submitted and denied. A zoning request was also proposed in 1956 to build a public playground on the site. Documents pertaining to environmental conditions of the Property to aid in the identification of RECs is included in Appendix H.

Duffield reviewed the City of Philadelphia online zoning archive database and Licenses and Inspections online permit database for the Property address 2119 W. Clearfield Street. A permit for a 6,000-gallon heating oil underground storage tank to be installed on the property in 1934. No records for abandonment or removal of the tank are reported.

4. HISTORICAL USE INFORMATION

Duffield reviewed historical maps, aerial photographs and Sanborn fire insurance maps collected by EDR. The historical use information, summarized below, was reviewed for past usage of the Property and surrounding areas that may affect environmental conditions.

A. PHILADELPHIA GEOHISTORY NETWORK

Duffield searched the Philadelphia GeoHistory Network, which provides historic mapping for the period of 1862 through 1962, for additional information pertaining to the Property, if any. Philadelphia Land Use Maps, Appraisal Maps, and Philadelphia Atlas Maps from 1862, 1895, 1910, 1942, and 1962 were reviewed and are included in Appendix E.

Table B: Philadelphia GeoHistory Maps

Map Date	The Property	Adjoining Sites
1862	The Property is mapped as undeveloped land within city blocks.	Adjoining sites are mapped as undeveloped land. Railroad lines appeared north and west of the Property.
1895	The Property is mapped with some residential buildings.	Adjacent to the west the parcel is mapped as owned by Margt Stern. The adjacent parcels to the north are mapped as residential dwellings. The property adjoining to the west is largely mapped as vacant land, with an apparent structure in

Map Date	The Property	Adjoining Sites
		the northern portion of the city block. The adjoining properties to the south appear as residential buildings and vacant parcels.
1910	Jacob Hornung Brewery is mapped on the east side of the Property. The west side of the property contained buildings and vacant parcels.	Margt Stern is mapped as owning the adjoining parcel to the east. Likely residential buildings adjoin the Property to the west, south and north. North of the residential properties in the north is a window shade factory. Northeast of the Property is the steel manufacturing company and bronze foundry.
1942	Hornung Brewery appears to occupy the entire Property.	Keystone Lubricating adjoins the property to the east. Apparent residential buildings are depicted adjoining to the south north and east. St. Mary's R.C. Church appeared southwest of the Property. A coal yard and railroad siding appeared northeast of the Property.
1962	The Property in the 1962 geohistory map appeared similar to the 1942 map.	The adjoining sites in the 1962 geohistory map appeared similar to the 1942 map.

B. HISTORICAL AERIAL PHOTOGRAPHS

Duffield reviewed historical aerial photographs provided by EDR from the years 1943, 1945, 1959, 1965, 1967, 1971, 1975, 1981, 1988, 1992, 1999, 2005, 2010, 2013 and 2017. The following table summarizes pertinent information from the review of the historical aerial photographs, which have been included in Appendix F.

Table C: Historical Aerial Photograph Summary

Aerial Photograph Date	The Property	Adjoining Sites
1943	The property appears developed with possible commercial and residential buildings. Vacant parcels are also present.	Railroads and railyards are developed northeast of the property. Commercial development and vacant lots appear north of the Property and commercial buildings appear east of the Property. Residential properties are present to the south and west.
1945, 1959	No significant changes are apparent.	No significant changes are apparent.
1965	The northern and south and portions of the center of the property appeared as vacant land.	No significant changes are apparent.
1967, 1971 and 1975	No significant changes are apparent.	No significant changes are apparent. In 1975 the building to the northeast appeared as up to seven stories.
1981	Additional buildings appeared to have been removed from the west side of the property	No significant changes are apparent.
1988, 1992, 2005	No significant changes are apparent.	No significant changes are apparent.
2010	Buildings on the east side of the property appear to have been removed.	No significant changes are apparent.

Aerial Photograph Date	The Property	Adjoining Sites
2013	Grassy areas are present on the Property.	No significant changes are apparent.
2017	Additional grassy areas are present in an oval shape on the west side of the property.	No significant changes are apparent.

C. HISTORICAL FIRE INSURANCE MAPS

Duffield reviewed historical Sanborn Fire Insurance Maps (Sanborn Maps) for the Property provided by EDR for the years 1921, 1951, 1975, 1980, 1989, 2000, 2002, 2004 and 2006. The following table summarizes information from the review of the Sanborn Maps, which have been included in Appendix G.

Table D: Historical Fire Insurance Map Summary

Sanborn Map Date	The Property	Adjoining Sites
1921	The property is mapped as developed with Jacob Hornung, Tioga Brewery along the west side of the property. The various buildings on supporting the brewery, including stock houses, auto storage and production areas are also mapped. The Hornung's Garage 1 st , the Burmeister Auto Body and Repair Co is mapped along the eastern portion of the Property. Three, buried, 550 gallon gasoline tanks are depicted in the southwest corner along W. Clearfield Street. Some of the property appeared as undeveloped with buildings. In addition, a 2-story and 3-story stores and rowhomes are mapped in the northwest corner of the Property.	The adjoining properties to the north are residential buildings. Within the block to the north, a window shade manufacturer and a steel manufacturing company are mapped. South and west of the property are mapped as residential. The adjacent property to the east is mapped as a lubricant manufacturing company. A warehouse for oil storage is mapped adjacent to the northeast of the Property. Storage and an auto facility is mapped adjacent to the southwest corner of the Property.
1951	The property is mapped as Jacob Hornung Brewery. The entire Property appeared developed with buildings. The garage and three 550 gallon buried tanks are still depicted.	The adjacent property to the north is mapped as a private garage, lumber storage, and retail buildings. The former window shade factory to the north is mapped as a Tenant Factory. The steel factory continues to be mapped to the northwest. The lubricating manufacturer continues to occupy the site to the east, and a tank room has been added. The properties to the west and south appear as single-family rowhomes and retail. An undertaker is also mapped adjacent to the southwest. St Mary's Church is mapped to the southwest.
1975	All of the existing buildings on the west side of Property appeared to have been demolished. A shelter is mapped along 22 nd street and a playground mapped on the north end of the Property. A garage and other structures are mapped and are oriented as present day. The three buried tanks are no longer depicted.	The steel manufacturing co appears to have expanded onto the former window shade factory. A club is mapped adjacent to the southeast of the Property, replacing single family homes. The properties to the south, southwest and west are similar to the previously reviewed map.

Sanborn Map Date	The Property	Adjoining Sites
1980	No significant changes were apparent from the previously reviewed map.	No significant changes were apparent from the previously reviewed map.
1989	No significant changes were apparent from the previously reviewed map.	A Baptist Church appears in place of the former Club, southeast of the Property. No other changes were observed.
2000	No significant changes were apparent from the previously reviewed map.	The previously observed steel manufacturing and lubricant manufacturing plant located north and east of the Property appear as vacant in the 2000 map.
2002	No significant changes were apparent from the previously reviewed map.	No significant changes were apparent from the previously reviewed map.
2004	No significant changes were apparent from the previously reviewed map.	No significant changes were apparent from the previously reviewed map.
2006	No significant changes were apparent from the previously reviewed map.	No significant changes were apparent from the previously reviewed map.

5. SITE RECONNAISSANCE

A site reconnaissance of the Property was performed on July 21, 2022. The walking reconnaissance was performed by Duffield’s personnel, Eva Gladish, P.G. and consisted of a visual review of present site conditions for indications of RECs along with conducting an inventory of universal hazardous wastes.

A. METHODOLOGY AND LIMITING CONDITIONS

No limiting conditions were encountered during the walking reconnaissance of the Property.

B. SITE SETTING

1. CURRENT USE OF THE PROPERTY

The Property consists of the Panati Recreation Center and playground. The playground was renovated in 2015. Current use of the Property is for recreation and includes a basketball court and a recreation center that hosts community activities.

2. DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE PROPERTY

The Property is located in the Allegheny West neighborhood. The playground was renovated in 2015 to include better lighting, surveillance cameras, repaved basketball court, new playground equipment and an outdoor exercise area. The recreation center building was likely built between 1962-1965 as noted from the observations made during the historical map and aerial photograph review.

3. CURRENT USES OF ADJOINING SITES

The Property is located within the Allegheny West neighborhood of Philadelphia (Photograph 1). The areas surrounding the Panati Playground consists of rowhomes, retail stores, churches and apparent abandoned factories to the north and east.

- **North:** The adjoining site to the north is barber shop (Photograph 2) and an abandoned steel factory (Photograph 3).
- **West:** The area adjoining properties to the west consist of residential buildings and retail businesses (Photograph 4).
- **East:** The adjoining property to the east appears as an abandoned factory, now used as storage. (Photograph 5).
- **South:** The adjoining areas to the south are residential and retail buildings and a church. (Photograph 6).

C. INTERIOR OBSERVATIONS

The facility is one story without a basement. The interior consists of an office a kitchen area (Photograph 7). Bathrooms are located in the entryway hallway (Photograph 8). The Property is used as a food storage and distribution center with volunteers from the community. Pallets and boxes of food are stored throughout the main room and kitchen area (Photograph 9). The recreation center also has a storage room (Photograph 10), an office area, used as storage (Photograph 11) and a utility room (Photograph 12)

D. EXTERIOR OBSERVATIONS

Playground: The front of the playground and recreation center entrance is paved with concrete sidewalk and walkways are present at the entrance. Playground equipment is present on the south side of the property. Basketball courts are present on the northern part of the property (Photograph 1). An exercise track and green space is present on the east side of the property (Photograph 13). And the Philadelphia Water Department has several rain gardens on the Property (Photograph 14).

Recreation Center: The recreation center building is a one-story building with stone, tile and murals on the front. The building entrance is on 22nd street in the middle of the block.

6. INTERVIEWS

A. INTERVIEW WITH OWNER REPRESENTATIVE AND SITE MANAGER

Duffield's personnel, Ms. Eva Gladish, interviewed Mr. Ron Hinton during the walking reconnaissance on February 25 and March 1, 2022. Mr. Hinton is the president of the Allegheny West Foundation and Recreation Center Leader. Mr.

Hinton confirmed that the building is currently used as a food distribution facility, recreation center and polling center.

The facility is connected to public water and sewer and the building is heated using natural gas.

B. INTERVIEW WITH GOVERNMENT OFFICIAL

Duffield's personnel, Eva Gladish contacted Ms. Quadira Glover of the PADEP Southeast Regional Office on July 14, 2022, by email to inquire of environmental records concerning the Property. Ms. Glover indicated that no records are available for the Property. Correspondence with Ms. Glover is included in Appendix H.

C. INTERVIEW WITH PAST OWNERS, OPERATORS, AND OCCUPANTS

Duffield was unable to obtain interviews with past owners, operators, and occupants.

7. EVALUATION

A Duffield environmental professional has evaluated the data used to support the preparation of this Phase I ESA report. The environmental professional's qualifications and those of the environmental technician are presented in Appendix K.

A. FINDINGS AND OPINIONS

Duffield reviewed the gathered information to identify RECs. According to ASTM E1527-13, the term REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. RECs do not include *de minimis* conditions that generally do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of regulatory agencies.

Findings of interest for this Phase I ESA and associated opinions are as follows:

- **The Property: Panati Playground and Recreation Center: 3101 N 22nd Street**

Review of historical documents, including aerial photographs and Sanborn Maps, indicates that the Panati Playground has occupied the property between 1962 and 1965.

Underground Storage Tanks: Three underground storage tanks containing gasoline were depicted in the 1921 and 1951 Sanborn Maps, when the southeast area of the property was occupied by a garage. A permit for a 6,000 gallon fuel oil UST was issued in 1934 for use at the on-site brewery. The UST was to be installed two feet below ground surface, that is described as 76 inch diameter and 6 feet long. No documentation of removal of the three gasoline tanks of the one

heating oil tank were found in the online search. An inquiry of the storage tanks was sent to PADEP that revealed no documents relating to the USTs on site. The potential presence of four USTs or unknown condition on the Property is a REC.

Urban Land. Urban land in Philadelphia is often environmentally impacted by imported fill material containing hazardous substances, in particular lead, arsenic, and polynuclear aromatic hydrocarbons (PAHs). In our experience, regulatory agencies do not intentionally pursue cleanup of this common and widespread condition. However, if soils from the site were to be removed, it is likely that the soil would not be considered “clean” and should be managed in accordance with applicable PADEP requirements (e.g., PADEP, 2010. Management of Fill Policy). It is Duffield’s opinion that the potential presence of historic fill at the Property is not considered a REC, but rather a *de minimus condition* and a potential business risk.

- **Global Montello Group, 2200 W. Allegheny Ave**

Relative Location: The site is 309 feet to the northwest of the Property.

State and tribal leaking storage tank lists (LUST/LAST). This site is a gasoline service station. The Radius Map Report (Appendix D) lists the Global Montello Group at 2200 W. Allegheny Ave as a LUST site. The Radius Map report shows the location of this site at the northwest corner of W. Lippincott Street and North 22nd Street. Releases of petroleum from USTs occurred in 2021, 1998, 1994 and impacts to soil were reported. The releases reported in 1998 and 1994 are noted as cleanup completed (site characterization report received). The 2021 release was reported as a release of gasoline to soil and that interim remedial actions were initiated or completed.

With the history of petroleum impact to soils at the Global Montello Group site, there is the potential that this site has impacted groundwater conditions at the Property and is considered a REC.

- **Passyunk Homes, 3111 S 23rd Street**

Relative Location: The site is mapped incorrectly by the Radius Map Report.

State and tribal leaking storage tank lists (LUST/LAST). The EDR Radius Map Report (Appendix D) Passyunk Homes as a LUST. The address of this site approximately 10 mile south of the Property. As this site is located outside the search radius and is downgradient of the Property it is not a REC.

- **City of Philadelphia, Garage 4233, 3201 Fox Street**

Relative Location: The site is located approximately 1100 feet northwest of the Property.

State and tribal leaking storage tank lists (LUST/LAST). The Radius Map Report (Appendix D) lists the City of Philadelphia Garage 4233 located at 3201 Fox

Street as a LUST site. The Radius Map Report indicates a release of petroleum to soil occurred in 2012. The status is listed as cleanup complete. Given the relative distance of this site from the Property and that the release only occurred to soil, site conditions at the City of Philadelphia Garage are not suspected to have impacted the Property and are not considered a REC.

- **Allegheny Citgo, 2401 W. Allegheny Ave**

Relative Location: The site is located approximately 1100 feet northwest of the Property.

State and tribal leaking storage tank lists (LUST/LAST). The Radius Map Report (Appendix D) lists Allegheny Citgo, located at 2401 W. Allegheny Ave as a LUST site. The Radius Map Report indicates a release of petroleum occurred in 1994, 1998, that impacted soil. The status is listed as cleanup complete. PADEP eFACTS website lists the site as active Environment Cleanup and Brownfields site. Three confirmed releases occurred in 2021, 1998, and 1994, with cleanup noted as completed for the 1998 and 1994 events. The 2021 release status is Interim Remedial Action or Complete. Given the relative distance and that the release is noted for soils not groundwater, environmental conditions at the Allegheny Citgo are not expected to have impact the Property and is not considered a REC.

- **Philly Gas, 2044 W. Allegheny Ave**

Relative Location: The site is located approximately 400 feet northeast of the Property.

State and tribal leaking storage tank lists (LUST/LAST). The Radius Map Report (Appendix D) lists Philly Gas, located at 2044 W. Allegheny Ave as a LUST site. Review of the Radius Map Report and PADEP eFACTS website indicate that this site achieved regulatory closure under the Background Statewide Health Standard in 2005 for soil and groundwater. Another release occurred in 2007 impacting soil and a site characterization report was approved in 2008.

While this site achieved closure, with the history of petroleum impact to soil and groundwater and the use of a background standard to achieve that closure, there is the potential that the Philly Gas site has impacted groundwater conditions at the Property and is considered a REC.

- **Thyssenkrupp Budd Co Hunting Park FAC, 2450 W Hunting Park Ave**

Relative Location: The site is located approximately 1600 feet northwest of the Property.

State and tribal leaking storage tank lists (LUST/LAST). The Radius Map Report (Appendix D) lists the Thyssenkrupp Budd Co Hunting Park FAC, 2450 W Hunting Park Ave as a LUST site. The Radius Map Report indicates a release of unleaded gasoline to soil and groundwater was discovered in 2005 during tank

closure activities. The 2005 release is listed as interim remedial actions initiated. The status is listed as cleanup complete in 2006 for soil impacts.

State and tribal voluntary cleanup (VCP) sites. The Radius Map Report (Appendix D) lists the Thyssenkrupp Budd Co Hunting Park FAC, 2450 W Hunting Park Ave as a VCP site. The Radius Map Report indicates that cleanup under Statewide Health Standards for PCBs, PAHs, chlorinated solvents, other organics and inorganics was planned for soil. From the PADEP eFACTS website and NIR was submitted and that assessment at this site is on-going. As the release reported at this site is limited to soil, the potential for this site to have impacted subsurface conditions at the Property is unlikely and is not a REC for the Property.

- **Keystone Place at East Falls LLC, 3310 Fox Street**

Relative Location: The site is located approximately 2124 feet northwest of the Property.

State and tribal voluntary cleanup (VCP) sites. The Radius Map Report (Appendix D) lists the Keystone Place at East Falls LLC, 3310 Fox Street as a VCP site. The Radius Map Report indicates that remediation of Fuel Oil No 2 is occurred at the site. Cleanup under the Site-specific Standard for petroleum compounds was described in a Final Report that was approved by PADEP in 2022. As this site has achieved regulatory closure for environmental conditions, it is not considered a REC for the Property.

- **2100 W. Allegheny Ave, 2100 W. Allegheny Ave**

Relative Location: The site is located approximately 273 feet northeast of the Property.

State and tribal Brownfield sites. The Radius Map Report (Appendix D) lists the 2100 W. Allegheny Ave site located at 2100 W. Allegheny Ave as a Brownfields site. A Phase I Environmental Site Assessment was completed in 2001, no other assessment or cleanup activities are reported by EDR or ACRES. Assessment of a Property is not considered a REC.

- **2034 W. Allegheny Ave, 2034 W. Allegheny Ave**

Relative Location: The site is located approximately 540 feet northeast of the Property.

State and tribal Brownfield sites. The Radius Map Report (Appendix D) lists the 2034 W. Allegheny Ave site located at 2034 W. Allegheny Ave as a Brownfields site. A Phase I Environmental Site Assessment was completed in 2001, no other assessment or cleanup activities are reported by EDR or ACRES. Assessment of a Property is not considered a REC.

- **2200 Stokey Street, 2200 Stokey Street**

Relative Location: The site is located approximately 1440 feet northeast of the Property.

State and tribal Brownfield sites. The Radius Map Report (Appendix D) lists the 2200 Stokey Street site located at 2200 Stokey Street as a Brownfields site. No assessment or cleanup activities are reported on the site by EDR or the ACRES. Assessment of a Property is not considered a REC.

- **2601-2613 N. 3rd Street, 2601-2613 N. 3rd Street**

Relative Location: The site is located approximately 2521 feet northwest of the Property.

State and tribal Brownfield sites. The Radius Map Report (Appendix D) lists the 2601-2613 N 3rd Street site located at 2601-2613 N 3rd Street as a Brownfields site. A Phase I Environmental Site Assessment was completed in 2001, no other assessment or cleanup activities are reported by EDR or ACRES. Assessment of a Property is not considered a REC.

B. VAPOR MIGRATION

The findings presented in this report were reviewed for indications of the potential for contaminant vapors to migrate onto the Property as a result of confirmed contaminated soil or groundwater on or near the Property.

Four USTs are potentially present on the Property. The USTs were reported to contain gasoline (unleaded) and heating oil. These tanks, if present, have the potential to have impacted subsurface conditions at the Property and are a potential source of volatile vapors.

Releases of petroleum compounds to soil and possible groundwater from the adjoining gasoline station to the northwest are a potential source of volatile vapors.

C. SIGNIFICANT DATA GAP REVIEW

A significant data gap is an absence of information that affects the ability of the environmental professional to identify RECs. As part of the ASTM E1527-13 standard (ASTM Section 12.7), the environmental professional identifies and comments on significant data gaps, if any, and identifies the sources of information consulted to address the data gaps. In addition, because the ASTM standard (Section 8.2.2) specifically requires an opinion, attention was made to the sufficiency of the regulatory agency file and records review. Duffield's opinion is provided below.

Adequacy of Regulatory Agency File and Records Obtained. If the Property or adjoining properties are identified on one or more of the "standard environmental record sources" referenced in Section 3.B (Standard Environmental Record Sources), the ASTM E1527-13 method (Section 8.2.2) requires an opinion from the

Environmental Professional regarding whether a “regulatory file review” is warranted. The “regulatory file review” conventionally refers to a visit to the Federal or State environmental regulatory agency’s file room. The ASTM method recognizes that performance of a regulatory file review is not always practical for reasons which include, but are not limited to, the following:

1. Identification of the Property or adjoining property through the standard environmental record sources is not accurate (e.g., the record provided an inaccurate address).
2. Information is not obtainable within 20 calendar days of a request.
3. The information can be obtained from alternative sources (e.g., on-site records, User-provided records, website databases, and interviews).

For this assessment, RECs were identified through review of the standard environmental record sources as identified in the ASTM E1527-13 method. Based on our experience, and in our opinion, additional regulatory file review is not necessary to provide additional information regarding environmental conditions at the Property.

Significant Data Gaps. Past owners or occupants were not interviewed as part of this Phase I ESA. Given that the City of Philadelphia has owned the Property since 1959, interviews with past owners, operators and occupants are not required to evaluate the presence of RECs. This data gap did not adversely affect our ability to identify RECs.

CONCLUSIONS

1. RECOGNIZED ENVIRONMENTAL CONDITIONS

Duffield has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of the Property located at 3101 N 22nd Street Philadelphia, Pennsylvania. Any exceptions to, or deletions from, this practice are described in Section 7.F (Exceptions or Deletions) of this report. This assessment has revealed no evidence of RECs in connection with the Property except for the following:

- Three gasoline USTs were depicted in the Sanborn maps located in the Automotive repair shop portion of the site along Clearfield Street. No documentation of the removal or closure of the three gasoline tanks was discovered in the records search. These tanks, if present, are of unknown condition and have the potential to have impacted soil and groundwater
- A permit for a 6,000 gallon heating oil tank was granted in 1934. No documentation of the removal or closure of the 6,000 heating oil tank was discovered in the records search. This tank, if present, is of unknown condition and has the potential to have impacted soil and groundwater.

- The adjoining site at 2200 W. Allegheny Ave has a history of petroleum impact to soils. There is the potential that this site has impacted subsurface conditions at the Property.
- The adjoining site at 2044 W. Allegheny Ave has a history of petroleum impacts to soils. There is the potential that the Philly Gas site has impacted groundwater conditions at the Property and is considered a REC.

2. CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECS)

A Controlled Recognized Environmental Condition (CREC) is a recognized environmental condition that is being appropriately characterized and remediated in accord with, and under the supervision of, authorized governmental agency charged with oversight of such recognized environmental condition. This assessment has not revealed evidence of controlled RECs in connection with the Property.

3. HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HRECS)

A historical Recognized Environmental Condition, as defined in the ASTM Standard, is an environmental condition that in the past would have been identified as a REC, but has been adequately addressed and, therefore, no longer represents a REC. Duffield has not identified any historical RECs in connection with the Property.

4. POTENTIAL BUSINESS RISKS

- Soils at the Property are mapped as Urban Land. Fill materials commonly contain regulated substances at concentrations that exceed PADEP Clean Fill standards and may require special handling if removed from the Property.
- The presence of Asbestos containing material in piping insulation above the ceiling and potentially present in accessible locations will require abatement ahead of demolition.

D. RECOMMENDATIONS

Duffield recommends that a geophysical survey of the Property be completed to search for the four USTs identified in the historic review as well as other anomalies. If present, these tanks should be removed along with completion of sampling and analysis to assess the removal action.

There is the potential for volatile vapors to migrate on-site from the nearby gasoline service station (22nd and Allegheny Avenue). Sampling and analysis of soil vapor or groundwater is recommended to assess this potential condition.

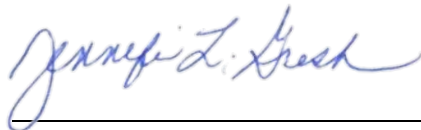

We note that three of the USTs are approximately located where a rain garden was constructed by the Philadelphia Water Department (PWD). Duffield recommends contacting PWD to inquire if any surveys or investigations were conducted prior to construction of the rain garden.

E. EXCEPTIONS OR DELETIONS

No exceptions or deletions from the standard Phase I ESA occurred during the completion of this Phase I ESA.

F. STATEMENT OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of the United States Environmental Protection Agency's "Standards and Practices for All Appropriate Inquiries" Code of Federal Regulations, Title 40, Part 312 (40 CFR Part 312). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jennifer L. Gresh, P.G.
Environmental Professional

G. NON-SCOPE CONSIDERATIONS

A Universal Hazardous Waste (UHW) survey was completed as part of this Phase I ESA. Asbestos and lead-based paint surveys were also performed as provided in this report (Appendix I). UHW, asbestos and lead-based paint do not meet the definition of hazardous substances under the All Appropriate Inquiry (AAI) practice.

Accordingly, the presence of these substances is not considered a REC, but rather a potential business risk and are discussed below.

1. UNIVERSAL HAZARDOUS WASTE INVENTORY

A universal hazardous waste (UHW) survey was conducted during the Phase I ESA and the findings were tabulated and quantities estimated on Table 1. UHWs included small quantities of paints, cleaning chemicals, freon containing units (e.g., water coolers, refrigerators), fluorescent light tubes and ballasts, mercury-containing equipment (thermometers), potential lead-acid batteries, and batteries for power tools. Duffield provides recommendations for management of UHWs on Table 1.

2. ASBESTOS SURVEY

Duffield's subcontractor, Synertech, Inc., conducted an asbestos survey of the building on July 26, 2022. Synertech provided a City of Philadelphia-licensed Asbestos Investigator to perform the asbestos survey and conduct bulk sampling.

The asbestos survey followed the guidelines outlined in 40 CFR Part 763 (Asbestos Hazard Emergency Response Act) and 29 CFR Part 1926.1101 (OSHA Occupational Exposure to Asbestos, Final Rule). Suspect asbestos-containing materials (ACMs) were sampled and analyzed for asbestos content via Polarized Light Microscopy (PLM), method EPA 600/R0-93/116, the standard method of analysis for determining asbestos content in building materials. Synertech's report is provided in Appendix I.

Asbestos-containing materials were identified in the building which included pipe insulation, transite boiler flue, and caulk. Asbestos-containing building materials were assumed to be present in certain inaccessible areas of the building above the ceiling, behind walls, inside the boiler internal, fire doors, and roofing materials. These are summarized on Table 3.

Synertech recommends the removal of asbestos-containing materials prior to conducting renovations or demolition as per local and Federal regulations.

3. LEAD-BASED PAINT SURVEY

Duffield's subcontractor, Synertech, Inc. conducted a lead-based paint survey (LBP) on July 26, 2022. A licensed Lead Inspector/Risk Assessor performed the LBP inspection using an X-Ray Fluorescence Spectrum Analyzer (XRF). Synertech's report is provided in Appendix I.

Lead-based paint was identified on mosaic tile, wood frames, and door supports outside of the building as well as wood frames, window sills, and window sashes inside the building. A wall below the windows and a shelf in the equipment room and storage room also tested positive for lead-based paint. Table 4 summarizes the locations of lead-based paint coated building materials at the Property as compared to the threshold values described below.

The threshold values are as follows:

- The City of Philadelphia, Department of Health defines LBP as equal to or greater than 0.70 mg/cm² via XRF.
- The Federal Department of Housing & Urban Development (HUD) and Environmental Protection Agency (EPA) defines LBP as equal to or greater than 1.00 mg/cm² lead via XRF.
- The OSHA definition correlates to a presence or absence of lead content in paints and coatings. OSHA considers results greater than 0.00 mg/cm² lead via XRF a Lead Containing Coating (LCC) and >0.01% by weight via paint chip analysis.

Synertech provided recommendations for the repair, renovation, and/or removal of lead containing materials under the various regulations (EPA, OSHA, HUD, etc.) in their report.

H. ADDITIONAL SERVICES – LEAD IN SURFACE SOIL SCREENING

Duffield advanced 10 soil borings via hand auger to 6 inches below the ground surface to collect soil samples from the 0-3 inch interval and 3-6 inch interval. In total, 20 samples were collected. Generally, the soils were comprised of silt, some sand and gravel; light and dark brown and orange brown, moist, compact and non-cohesive. Soil sample locations were biased toward areas of soil erosion and high pedestrian use. Soil samples were submitted to Alpha Analytical Laboratories and analyzed for total lead. A summary of lead results is presented in Table 2 and the Alpha Analytical laboratory package is presented in Appendix J. Sample collection locations are depicted on Figure 2. Analytic results for lead ranged from 44 milligrams per kilogram (mg/kg) to 180 mg/kg, well below the U.S. EPA lead screening level for lead in bare soil of 400 mg/kg. Based on these results, Duffield recommends no further assessment of lead in the surface soils at the Property.

Totals							
	----	20					

Legend:

BGS = below grade surface

XRF = Hand held X – Ray Fluorescence (XRF) meter used for lead analysis - **XRF Screening was not performed**

Lab = Bench top laboratory analysis using Inductively Coupled Plasma (ICP) for lead analysis.

mg / kg (milligrams per kilogram) = ppm (parts per million); > = greater than; < = less than

A lead sample result of **400 mg / kg (400 ppm)** refers to: EPA’s established lead screening level for lead in bare soil in residential play areas. This value is for guidance only. This is neither a clean-up standard nor is it enforceable. It is a conservative estimate for a level protective of public health in residential soils based on an analysis of the direct ingestion pathway for children. EPA views soil levels less than 400 mg / kg as generally safe for residential areas.

A lead sample result of **1,200 mg / kg (1,200 ppm)** refers to: EPA’s standard for lead in bare soil for clean-up of non-play areas using federal funds.

APPENDIX A

TAX PARCEL INFORMATION

Know all Men by these Presents

THAT, JOHN GREEN, *Sheriff of the County of* PHILADELPHIA

in the Commonwealth of Pennsylvania, for and in consideration of the sum of

EIGHT HUNDRED DOLLARS (\$800.00)

dollars, to me in hand paid, do hereby grant and convey to CITY OF PHILADELPHIA

PREMISES "A"

ALL THAT CERTAIN lot or piece of ground with the buildings and improvements thereon erected. Situate in the 11th (formerly part of the 38th) Ward of the City of Philadelphia and described according to a Plan of Property made for Michael H. Lipper by John H. Robinson, Surveyor and Regulator of the 6th District, dated 4/10/1956, and further described as follows, to wit:

BEGINNING at a point on the Northerly side of Clearfield Street (50 feet wide) at the distance of 119 feet 10 inches measured in an Eastwardly direction along the said side of Clearfield Street from the intersection of the Northerly side of Clearfield Street with the Easterly side of 22nd Street (60 feet wide); thence extending through a wall the five following courses and distances: (1) North 11 degrees 21 minutes East 63 feet 10 inches to a point (2) South 78 degrees 39 minutes East 1 foot and 1 inch to a point (3) North 11 degrees 21 minutes East 39 feet 10 inches to a point (4) North 78 degrees 39 minutes West 1 foot and 1 inch to a point (5) North 11 degrees 21 minutes East 70 feet 4 inches to a point; thence extending South 78 degrees 39 minutes East through another wall 60 feet 2 inches to a point; thence extending South 11 degrees 21 minutes West through another wall 174 feet to a point on the Northerly side of Clearfield Street; thence extending North 78 degrees 39 minutes West along the Northerly side of Clearfield Street 60 feet 2 inches to the first mentioned point and place of beginning.

APPENDIX B

SCOPE OF SERVICES

SCOPE OF SERVICES

1. **User Information.** Collect information from the User. The User is the entity that engaged Duffield Associates to perform the Phase I ESA. Standard items requested from the User are the following:
 - Any information regarding environmental liens, deed restrictions, activity and use limitations, or covenants filed or recorded under Federal, State, or local law, if available.
 - Access to the Property by arrangement with the appropriate parties, including building interiors.
 - A site drawing indicating the extent of the area to be evaluated, if one is available.
 - Current property owner's contact information.
 - Current site operator's contact information (if different than owner).
 - Environmental reports in your possession.
 - A completed User Questionnaire Form (provided by Duffield Associates).
2. **Property Interviews.** Seek interviews with the current owners and occupants. In the case of multiple occupants, we will seek to interview the major occupants and those likely, in our opinion, to have environmental issues. Interviews with at least one of the following will also be sought: current or past facility manager; past owners, occupants, or operators; or employees of current and past occupants. For certain abandoned properties, interviews may be sought from one or more owners or occupants of neighboring properties. A reasonable attempt will be made to perform interviews during the site reconnaissance or by telephone. Documents regarding current and past environmental conditions will be sought during these interviews.
3. **Historical Sources.** Search for up to two historical sources, usually aerial photographic records and historical fire insurance or topographic maps. Review of aerial photographs will constitute a visual inspection of the Property and adjoining properties. If available, the historical data will help us evaluate the likelihood that past usage of the Property and the surrounding area may have led to RECs. A database subcontractor will search for historical maps and provide copies of the available maps.
4. **Government Records.** Review information supplied by a database subcontractor gathered from State and Federal environmental regulatory agency databases for the Property and surrounding area. Search radii will be those of ASTM International's Standard Practice E1527-13. If the Property or the adjoining properties are identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing may need to be reviewed through a Freedom of Information Act (FOIA) request to assist the Environmental Professional in evaluation of whether a REC exist in connection with the listing. Review of agency files, where a FOIA request is required, may require your concurrence and additional time.

5. **Government Interviews.** Interview local, State, or Federal government officials, at Duffield Associates' discretion, if the Property is listed on the reviewed government records. The purpose of such interviews would be to discuss RECs and the current regulatory status of those conditions. In some cases, the reviewed records may be sufficient to render interviews unnecessary or unproductive, in our opinion. In such cases, interviews would not be conducted.
6. **Physical Setting.** Review a United States Geological Survey topographic map (or equivalent) to help evaluate probable drainage patterns and potential for historic off-site activities to affect environmental conditions on the Property.
7. **Site Reconnaissance.** Visually review the outdoor portions of the Property, to the extent not obstructed by adjacent buildings or other obstacles, with the intent of identifying readily observable potential RECs. Adjoining properties will also be observed from property lines and public access points. If buildings are present, Duffield Associates will conduct a visual review of a representative number of rooms in the interior of on-site structures, including apparent maintenance rooms, utility rooms, or storage areas, for indications of hazardous substance use, petroleum use, and pathways by which such materials could enter the environment exterior to the buildings.
8. **Additional Services.** For this project, a Universal Hazardous Waste Survey (UHW) and Lead in Soil Testing will be conducted. The UHW will be conducted at the same time as the site reconnaissance and observed UHW's will be tabulated and the quantity estimated. For the Lead in Soil Survey, up to 10 locations and 20 samples will be collected and analyzed for total lead. Samples will be collected in areas surrounding the building and biased toward areas of obvious erosion, such as unpaved pathways. Two samples per location will be collected, one from 0-3 inches and the second from 3-6 inches. Samples will be submitted to SGS labs for analysis of Total Lead by EPA SW-486 Method 6010D.
9. **Verbal Report.** Contact you following completion of the field work to discuss our findings and/or notify you of conditions that, in our opinion, may warrant further evaluation or exploration.
10. **Written Report.** Prepare a final report summarizing the information gathered during the Phase I ESA described above, and our conclusions and recommendations regarding indicated environmental conditions at the Property. The organization of the report will be based on the ASTM International recommended format (E1527-13). An electronic copy of the report will be provided by email. No hardcopy is anticipated.

USER QUESTIONNAIRE

Project Name: _____

Project Number: _____

USER QUESTIONNAIRE

Phase I Environmental Site Assessment

Date: 7/13/22

Name of person providing information: Daniel Harkins

Company the User Represents: City of Philadelphia

Parties that intend to rely on the results of the Phase I Environmental Site Assessment are known as the "Users" and must provide the following information, if they are aware of it. Your response should represent the current collective knowledge of the parties relying on the Phase I Environmental Site Assessment.

1. Environmental cleanup liens.
 - Did a search of recorded land titles records identify any environmental liens filed or recorded against the Property?
No lien search was conducted that I am aware of.
2. Activity and land use limitations.
 - Did a search of recorded land title records identify any activity or use limitations, such as engineering controls, land use restrictions, or institutional controls, that are in place at the Property or have been filed and/or recorded against the Property?
No land title search has been conducted that I am aware of.
3. Specialized knowledge or experience.
 - Do you have any specialized knowledge or experience related to the Property or nearby properties? For example, are you involved in the same line of business?
No, I do not have any specialized knowledge related to the Property.
4. Relationship of the purchase price to the fair market value of the Property.
 - Does the purchase price being paid for the Property reasonably reflect the fair market value of the Property?
The City is not purchasing this property.
 - If not, is there a lower purchase price because the Property is or may be contaminated?
5. Commonly known information about the Property.

Are you aware of information about the Property that would help identify releases or threatened releases? For example:

 - Do you know the past uses of the Property?
I do not of any past uses of the Property.
 - Do you know specific chemicals that are or were present at the Property?
I do not chemicals that are present at the Property.
 - Do you know of any spills that have taken place at the Property?
I do not know of any spills at the Property.
 - Do you know of any environmental cleanups that have taken place at the Property?
I do not know of any cleanups at the Property.

USER QUESTIONNAIRE (CONTINUED)

6. Obvious or likely contamination at the Property.

- Based on your knowledge and experience related to the Property, are there any obvious indicators that point to the presence or likely presence of releases at the Property?

No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2022 has revealed that there are 3 SEMS sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2022 has revealed that there

EXECUTIVE SUMMARY

are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQQ: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQQ list, as provided by EDR, and dated 06/20/2022 has revealed that there are 3 RCRA-VSQQ sites within approximately 0.25 miles of the target property.

Local Lists of Landfill / Solid Waste Disposal Sites

PA HIST LF: The report provides facility information recorded in the Pennsylvania Department of Environmental Protection ALI database. Some of this information has been abstracted from old records and may not accurately reflect the current conditions and status at these facilities.

A review of the PA HIST LF list, as provided by EDR, has revealed that there is 1 PA HIST LF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MERIT PRODUCTS SITE Database: HIST LF INVENTORY, Date of Government Version: 06/02/1999 Facility Status: INACTIVE Site ID: 1-524	1940 INDIANA AVE	SE 1/8 - 1/4 (0.211 mi.)	M50	169

Local Lists of Registered Storage Tanks

PA ARCHIVE UST: The list includes tanks storing highly hazardous substances that were removed from the DEP's Storage Tank Information database because of the Department's policy on sensitive information. The list also may include tanks that are removed or permanently closed.

A review of the PA ARCHIVE UST list, as provided by EDR, and dated 03/09/2022 has revealed that there are 13 PA ARCHIVE UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

A review of the PA ACT 2-DEED list, as provided by EDR, and dated 04/23/2010 has revealed that there is 1 PA ACT 2-DEED site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Hazardous Waste Summary:

Waste Code: D000
 Waste Description: Not Defined

Waste Code: D002
 Waste Description: CORROSIVE WASTE

Waste Code: F006
 Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
 Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SUPERFUND (NON-NPL)

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

 Parcel size: 0.92
 Latitude: 40.00587915
 Longitude: -75.161027383
 HCM Label: -
 Map Scale: -
 Point of Reference: -
 Highlights:

The property was previously occupied by a coal yard between 1895 and 1910, a train platform between 1895 and 1975, and residences since at least 1895 through the mid 1960s. The City of Philadelphia purchased the property in 1942 and it has been operated as a park since that time. The property includes playground equipment, a basketball court, vegetated and paved open space, a sprayground, and a recreation building. The cause of the potential contamination is unknown; however, the property subsurface likely contains historic fill and nearby rail, manufacturing/industrial, automotive, and dry cleaning uses may have affected the property subsurface. The planned use for the property is continued use as a public park and recreation facility.

 Point of Reference: -
 Highlights:

The property, a former candy factory, was under agreement when the Phase I was performed. The buyer is an experienced "green" developer who ultimately settled on the site, and intends to develop a transit oriented mixed use redevelopment, catering mainly to Temple University students in the surrounding area. Former Use: The property is a former candy factory.

Name: TIOGA UNITED GARDEN
 Address: 2000-2008 W. TIOGA ST
 City,State,Zip: PHILADELPHIA, PA 19140
 Recipient Name: Philadelphia Redevelopment Authority
 Grant Type: Assessment
 Property Number: 112088100, 112088200, 112088300, 112088400
 Parcel size: 0.46
 Latitude: 40.007187
 Longitude: -75.161972
 HCM Label: -
 Map Scale: -
 Point of Reference: -
 Highlights: Property is an urban garden. No change of use is proposed. Former Use: The Property was historically used as a dry cleaner and industrial site uses were identified at surrounding sites. Limited sampling and analysis of surface soils for arsenic, lead and PAHs was conducted. Analytic results were less than PADEP's SWHS for residential use. Due to the site use, additional sampling of subsurface soils and groundwater was recommended.

 City,State,Zip: PHILADELPHIA, PA 19140
 Recipient Name: Philadelphia Redevelopment Authority
 Grant Type: Assessment
 Property Number: -
 Parcel size: 1.2
 Latitude: 40.007463556
 Longitude: -75.161473768
 HCM Label: -
 Map Scale: -
 Point of Reference: -
 Highlights: The property was developed with residences by 1895 through at least 1921; an undertaker, a private morgue, equipment storage, a shed, and stable between 1921 and 1951; and recreational uses from 1965 through the present. The City of Philadelphia purchased the property in 1962. The property is currently used for recreational purposes, including ball fields. How the property potentially became contaminated is unknown; however, the property was used as an undertaker and a morgue, and there are concerns about contamination from those uses. The planned use for the property is for continued recreational uses.

Highlights: The property was developed with residences by 1895 through at least 1921; an undertaker, a private morgue, equipment storage, a shed, and stable between 1921 and 1951; and recreational uses from 1965 through the present. The City of Philadelphia purchased the property in 1962. The property is currently used for recreational purposes, including ball fields. How the property potentially became contaminated is unknown; however, the property was used as an undertaker and a morgue, and there are concerns about contamination from those uses. The planned use for the property is for continued recreational uses.

 Highlights:

Sale of property would not have occurred without the funding from the US EPA Former Use: The property is located at 1844 West Sedgley Avenue, Philadelphia, Pennsylvania between North 19th Street and North 17th Street. The Site occupies approximately 3.19 acres and consists of several warehouses occupying approximately 2.24 acres as well as three parking and delivery areas along West Sedgley Avenue. Warehouses were in varying ranges of disrepair and three smaller wood/brick structures were observed to be partially collapsed at the time of the site visit and were unable to be evaluated for health and safety reasons. The facility was previously used for vehicle storage and maintenance and storage of miscellaneous debris including furniture, building materials, books, paper files, and drums and other chemical storage containers.

 Property Description:

The property is located at 1844 West Sedgley Avenue, Philadelphia, Pennsylvania between North 19th Street and North 17th Street. The Site occupies approximately 3.19 acres and consists of several warehouses occupying approximately 2.24 acres as well as three parking and delivery areas along West Sedgley Avenue. Warehouses were in varying ranges of disrepair and three smaller wood/brick structures were observed to be partially collapsed at the time of the site visit and were unable to be evaluated for health and safety reasons. The facility was previously used for vehicle storage and maintenance and storage of miscellaneous debris including furniture, building materials, books, paper files, and drums and other chemical storage containers.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields Sites

Brownfields are generally defined as abandoned or underused industrial or commercial properties where redevelopment is complicated by actual or perceived environmental contamination. Brownfields vary in size, location, age and past use. They can range from a small, abandoned corner gas station to a large, multi-acre former manufacturing plant that has been closed for years.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

PFAS: Sites With Known PFAS Contamination

Perfluoroalkyl and polyfluoroalkyl substances (PFAS) are man-made chemicals, are resistant to heat, water and oil, and persist in the environment and the human body. PFAS are not found naturally in the environment. They have been used to make cookware, carpets, clothing, fabrics for furniture, paper packaging for food, and other materials that are resistant to water, grease, or stains. They are also used in firefighting foams and in a number of industrial processes.

ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/03/2021	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 02/11/2022	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Version Date:	2019
South Map:	14072064 PHILADELPHIA, PA
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
4207570095F	FEMA Q3 Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
4207570181F	FEMA Q3 Flood data
4207570182F	FEMA Q3 Flood data
4207570181G	FEMA FIRM Flood data
4207570182H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GERMANTOWN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

2G	1/2 - 1 Mile NNE	NW
3G	0 - 1/8 Mile North	S
4G	0 - 1/8 Mile East	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land
 Soil Surface Texture: variable
 Hydrologic Group: Not reported
 Soil Drainage Class:
 Hydric Status: Partially hydric
 Corrosion Potential - Uncoated Steel: Not Reported
 Depth to Bedrock Min: > 0 inches
 Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

 : Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.
 : Zone 3 indoor average level < 2 pCi/L.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Telephone: 610-344-6105

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Telephone: 717-702-2045

OTHER STATE DATABASE INFORMATION

Pennsylvania Oil and Gas Locations

Source: Pennsylvania Department of Environmental Protection

Telephone: 814-863-0104

An Oil and Gas Location is a DEP primary facility type related to the Oil & Gas Program. The sub-facility types related to Oil and Gas that are included in this layer are: Land Application -- An area where drilling cuttings or waste are disposed by land application; Well-- A well associated with oil and/or gas production; Pit -- An approved pit that is used for storage of oil and gas well fluids. Some sub facility types are not included in this layer due to security policies.

RADON

State Database: PA Radon

Source: Department of Environmental Protection

Telephone: 717-783-3594

Radon Test Results Statistics by Zip Code

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
